Smart, Sustainable Water Solutions for Life

From a morning shower to a freshly brewed cup of coffee, from swimming to eating fresh produce, water is in every facet of our lives.

CPK-PRO+10AJCAT
CPK-PRO+10AJGAC

- High flow professional grade control valve
- Intelligent digital management system
- Programmable self cleaning cycles for long life
- Superior filtration capacity for whole home treatment
- Easy plumbing connections with integral bypass valve
- Simple elegant lines and design

American Made
components

CPK-PRO+LITEIOJCAT
CPK-PRO+LITEIOJGAC

- Easy hassle-free plumbing with simple inlet and outlet connections
- Large capacity for whole home treatment
- Structural 10 x 54 pressure vessel provides high flow and no pressure loss
- No waste water
- Intuitive and easy to operate bypass valve
- All polymer materials eliminate corrosion

Start enjoying the Kenai Pro+ difference today.

Contact a Kenai authorized dealer to install a Pro+ Professional Series Water Treatment System and start enjoying all the benefits of this whole home powerhouse.

Filtration

Removing contaminants from your water.

Water is the most important tool for our daily lifestyle. The quality and purity of the water in our homes is crucial to us and a critical component of a healthy diet. The responsibility of the 'final barrier' is on the homeowner to provide confidence in your water. This is entirely possible for your peace of mind with a properly applied water treatment system.

The water supplied to your home comes from one or a number of different sources depending on where you live. It can be from a lake, river or groundwater from a well. The characteristics of the water will depend on the journey that it takes to get to your home. There will be particles, minerals, metals and chemicals that are dissolved in the water.

In the typical home in the United States, we use approximately 60 gallons of water per person every day, on average. Water is the "universal solvent" and unfortunately, this optimizes living organisms' ability to live and function.

Pro+ | Pro+**Lite**

Systems with activated carbon are proven to remove certain chemicals, particularly organic chemicals, pesticides, and chlorine from water. Systems with catalytic carbon removes chloramines, chlorine, pesticides, and most other VOC (Volatile Organic Chemicals). The Pro+Lite is designed to improve the quality of your water.

Catalytic Activated Carbon

- Higher Capacity for Chlorine Reduction/Removal
- Better Reduction of THMs, VOCs and Chloramines
- Reduction/Removal of Bad Tastes and Odors
- Better Reduction of Hydrogen Sulfide
- More Expensive

Activated Carbon

- Chlorine Reduction/Removal
- Limited Reduction of THMs, VOCs and Chloramines
- Reduction/Removal of Bad Tastes and Odors
- Limited Reduction of Hydrogen Sulfide
- Less Expensive

Pro+

SPECIFICATIONS

Plumbing Connections
3/4", 1", or 1 1/4" NPT

Drain Connection
3/4" NPT

System Flow Rates
12 gpm (15 psi drop with bypass)

Backwash/Rinse Flow
5 gpm

Operating Pressure
20 – 125 psi

Operating Water Temp
35 – 120 deg F

Operating Life
1 to 10 years
(depending on water quality)
