

Pro Water Program

A Uniquely Superior Water Treatment System

Point-of-Entry

KENAI™ EcoProMax

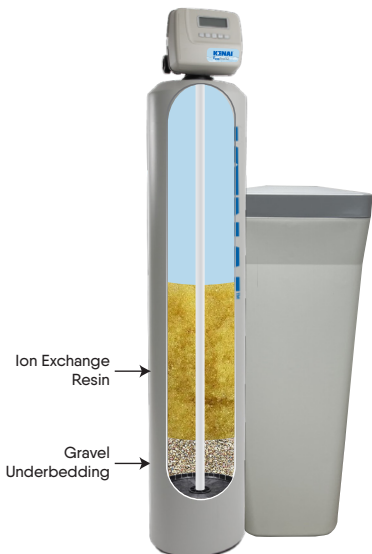

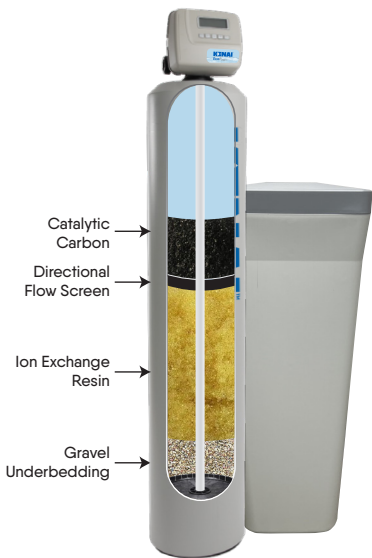

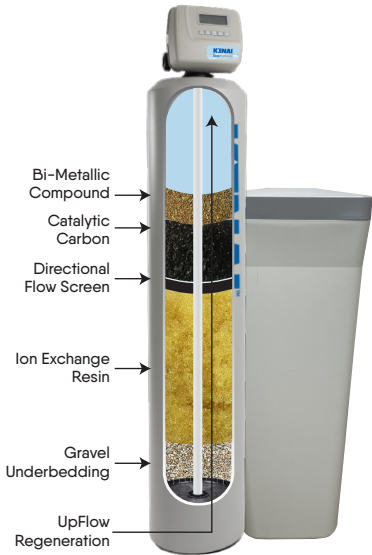

- Intelligent digital microprocessor controls system operations
- Bi-metallic compound converts chlorine to safer, less harmful chlorides and helps to inhibit microbial growth (KDF)
- Catalytic carbon reduces chlorine and chloramine
- Durable corrosion-resistant construction
- Built-in diagnostics ensures consistent, superior quality water
- Jacketed and weather protected
- Sold and serviced by certified professionals
- Easily upgrade to Charger's Total Connect Wi-fi System

KENAI™ EcoPro+ EcoPro+T

- Intelligent digital microprocessor controls system operations
- Catalytic carbon reduces chlorine and chloramines
- Durable corrosion-resistant construction
- Built-in diagnostics ensures consistent, superior quality water
- Jacketed and weather protected
- Sold and serviced by certified professionals
- For tannin reduction, try the EcoPro+T – same durable system built with tannin reduction properties

KENAI™ EcoPro32 EcoPro48

- Intelligent digital microprocessor controls system operations
- Durable corrosion-resistant construction
- Built-in diagnostics insures consistent, superior quality water
- Jacketed and weather-protected (when weather cover is added)
- Sold and serviced by certified professionals

Add Total Connect to your favorite Kenai unit

Advanced technology that meets the growing demand for remote monitoring of water treatment equipment.

Maintenance View

Map View

KENAI™ with Total Connect

- Access to real-time data on the performance of your water treatment systems.
- Manage the maintenance needs of several locations from one device using our convenient service reminders.
- Set up your daily service schedule using the data from one source as your guide.
- Save travel time between locations, knowing at a glance when salt replenishment is needed.
- Retrofit to your Kenai existing products, where applicable.
- Remote programming capabilities; regenerate your customer's unit from your office

Point-of-Entry

KENAI™ Pro+100 Pro+150

- High flow professional grade control valve
- Intelligent digital management system
- Programmable self cleaning cycles for long life
- Superior filtration capacity for whole home treatment
- Easy plumbing connections with integral bypass valve
- Simple elegant lines and design

KENAI™ EnviroPro EnviroPro²

- Environmentally friendly
- Requires no electricity
- Totally maintenance-free
- Easy hassle-free plumbing with simple inlet and outlet connections
- Large capacity for whole home treatment
- 10 x 54 pressure vessel provides high flow and no pressure loss
- Scale reduction without the use of salt or waste water
- Intuitive and easy-to-operate bypass valve
- All polymer materials eliminate corrosion
- Upflow service operation reduces the chance of fouling

- 5 micron Sediment filter with Scale Armor
- 1 micron chloramine reducing filter

KENAI™ AirOxPro 16 AirOxPro 26

- Helps to stop iron stains from occurring
- Provides clean, odor free water
- Protects your water softener equipment from "iron fouling"
- Protects plumbing fixtures, appliances and clothing
- Protects pipes from iron clogging and black oxidation caused by H₂S
- AirO₃Pro - ozone upgrade kit for AirOxPro units

KENAI™ ProLite100 ProLite150

- Easy hassle-free plumbing with simple inlet and outlet connections
- Large capacity for whole home treatment
- 10 x 54 pressure vessel provides high flow and no pressure loss
- No waste water
- Intuitive and easy-to-operate bypass valve
- All polymer materials eliminate corrosion

Point-of-Use

KENAI™ FreshStream

- Purified water in your kitchen
- Proprietary twist-off filter cartridges
- High capacity 75 GPD TFC RO membrane assembly for easy replacement
- Ultra-conservative 1:1 membrane system
- Quick connect o-ring seal fittings
- Compact size takes less space than most systems

KENAI™ FreshStream+

- Convenient vertical under sink unit with no need for a storage tank
- Quick-connect filter replacement with twist and lock feature
- LED light indicator on smart faucet alerts you when it's time to change the filter
- Enjoy better water with up to 96.8% reduction of Total Dissolved Solids (TDS)

KENAI™ UVPro

- LED ultraviolet light disinfection
- "Instant-on" devices, requiring no warm-up time to achieve disinfection, allowing for eco-friendly operation in response to water flow
- Extremely long service life resulting in reductions in lamp replacement and labor expenses
- Free of hazardous materials, which eliminates the risk of a mercury spill due to a lamp breakage
- Eco-friendly, extremely low power consumption and no potentially dangerous chemicals used in their construction
